Gangrene

What Is Gangrene?

Gangrene happens when tissues in your body die after a loss of blood caused by illness, injury, or infection. It usually happens in extremities like fingers, toes, and limbs, but you can also get gangrene in your organs and muscles. There are different types of gangrene

Signs and Symptoms

Dry gangrene symptoms include:

- Shriveled skin that changes from blue to black and eventually comes off
- Cold, numb skin
- Pain

Symptoms of wet gangrene include:

- Swelling and pain
- Fever and feeling unwell
- Red, brown, purple, blue, greenish-black, or black skin
- Blisters or sores with a bad-smelling discharge (pus)
- A crackling noise when you press on the affected area
- Thin, shiny, or hairless skin
- A line between healthy and damaged skin
- Internal gangrene causes severe pain in the affected area. For example, if you have gangrene in your appendix or colon, you'd probably have belly pain. Internal gangrene can also cause a fever.

Causes:

Gangrene may occur due to one or some of the following causes:

Lack of blood supply: Your blood provides oxygen, nutrients to feed your cells, and immune system components, such as antibodies, to ward off infections. Without a proper blood supply, cells can't survive, and your tissue decays.

Infection: If bacteria thrive unchecked for long, infection can take over and cause your tissue to die, causing gangrene.

Trauma: Wounds that are traumatic, such as gunshot wounds or crushing injuries from car crashes, can cause bacteria to invade tissues deep within the body. When such tissues are infected, gangrene can occur.

Benefit of SGS Therapy:

- Provides proper & nourishing blood circulation in the affected area of gangrene.
- Removes infection from the affected area of gangrene
- Supports Immune & lymphatic system of the body
- Maintains Homeostatic balance at the best possible level
- Effectively heals the affected gangrene area.

Suggested Products:

Grolyfe : Take 7 drops 3 times under the tongue
Minerjal : Take 10 drops 3 times in 100 ml of Drinking water
OmegaSat : 1 Softgel 2 times after meal
Alproxy : 1 Tablet 2 times after meal
SatvAmrut : 1 Capsule 2 times after meal
Satvika : 1 Tablets 2 times after meal
Comraid : 1 Capsule 3 times after meal
ActiSat : 1 Capsule 3 times after meal
LivoSat : Daily 1 Sachet 1 time
